Frontend

React.js, Vue.js, HTML, CSS, JavaScript, Blade

Banco de Dados

MySQL, SQL Server, MongoDB

Infra & DevOps

Docker, AWS, Azure, CI/CD, cPanel, Hostinger, Digital Ocean

Others

Git, REST APIs, Firebase, OAuth / SSO, WebSockets

PROFESSIONAL EXPERIENCE

TECH LEAD | SENSORAMA PLAY | 2025 - Current

- Technical leadership across multiple projects focused on the public sector (city governments and state governments). Defined system architecture, coding standards, and deployment pipelines.
- Created technical documentation, flowcharts, and architecture diagrams.
- Worked as a senior developer on web, mobile, API, 3D/2D game projects, and server infrastructure.
- Developed solutions to meet public bidding requirements and provided technical support during POC presentations.

Results:

- Complete refactoring of existing projects, improving performance and reducing costs.
- After I joined, due to my experience and technical capability, the company was finally able to solve existing problems and participate in several public bids with multiple products.

DEVELOPER | AMPLIMED | 2024 - 2025

- Worked as a mid-level developer and was the main person responsible for marketplace products such as online scheduling, telemedicine, mobile apps, and service queues.
- Led the refactoring of the marketplace and online scheduling app.
- Created microservices and white-label solutions for company clients.

Results:

- The new white-label system was adopted by dozens of clients, allowing semiannual sales targets to be achieved in a single quarter.
- Significant improvement in performance and scalability.

TECH LEAD | ASTRONFY | 2023 - 2024

- Technical lead responsible for the marketplace, affiliate dashboard, support system, and 2D/3D games.
- Implemented the platform's full web and mobile structure.
- Integrated national and international payment systems, as well as cryptocurrency payments.
- Communicated directly with clients in Europe and Asia, serving as a technical point of reference.

Results:

- Marketplace serving clients in more than 10 countries.
- Payment system processing thousands of monthly transactions.
- Major improvement in security and reduced onboarding time for new clients due to workflow improvements.

DEVELOPER | INFOGEN SISTEMAS | 2022 - 2023

- Progressed from intern to mid-level developer and became one of the leaders of the mobile app team.
- Worked on ERP projects (GeneXus), web portal development (.NET), and mobile applications.
- Led the complete refactoring of applications to React Native.
- Provided technical support to clients and assisted with deployment and integrations.
- Responsible for creating, maintaining, and updating app store listings as well as app versions.
- Mentored new developers who were starting at the company.

Results:

- Refactoring of more than 8 mobile applications.
- Stack standardization and reduced rework.
- More than 15 new modules created in the white-label standard for web apps.
- Created an end-to-end documentation handbook for mobile projects, including common errors and solutions for some ERP modules..

FREELANCE DEVELOPER | 2018 - Atual

- Developed on-demand projects for different clients and industries.
- Built landing pages, intranets, mini ERPs, real-time dashboards, mobile applications, general integrations, and multiplayer 3D games.
- Participated as a partner in an international sports project.

Highlights:

- Product presented at a medium-sized international trade fair in Germany.
- Business partnership with futsal player Ferrão.
- Worked with clients and partners in more than 4 countries.

EDUCATION

- **Computer Science – UnoChapecó / Cruzeiro do Sul (status to be defined)**
- **High School – EEB Marechal Bormann**
