PROFESSIONAL SUMMARY

Software Architect, Software Engineer and Tech Lead with 8+ years of professional experience across software development, engineering, solution architecture and technology consulting. Since the beginning of my career I have worked on the design, construction and technical evolution of systems and products; for the past 3+ years, I have repeatedly owned end-to-end architecture for systems, mobile applications and web platforms, from technical design through production operations.

I remain hands-on in development while also working across application and data architecture, integrations, cloud/VPS infrastructure, containers, CI/CD, build and deployment automation, testing strategy, performance, observability and production support. Mobile engineering is one of my strongest specialties, with experience from implementation through store release and long-term maintenance. I am also effective at translating technical and business problems into clear decisions for engineering, product, sales, clients and partners.

TECHNICAL EXPERTISE

Architecture & engineering: software architecture, system design, distributed systems, APIs, integrations, multi-tenancy, white-label platforms, queues, caching, WebSockets, scalability, performance, legacy modernization and cost/risk/maintainability trade-offs

Mobile: React Native CLI, Expo, TypeScript, Flutter, Swift, Objective-C, Java/Android, Firebase, App Store, Google Play, build automation, release management and long-term app maintenance

Backend & Web: Node.js, NestJS, PHP, Laravel, Blade, Livewire, C#/.NET, Java/Spring Boot, React, Next.js, Vue.js, Angular and JavaScript/TypeScript

Data, infrastructure & quality: MySQL, SQL Server, PostgreSQL, MongoDB, Python, Docker, GitHub Actions, CI/CD, AWS, Azure, DigitalOcean/VPS, load balancing, monitoring, backups, Playwright, Selenium and test automation

PROFESSIONAL EXPERIENCE

TECH LEAD | SENSORAMA PLAY | 2025 - Present

Software architecture, technical leadership and hands-on engineering across web, mobile, API, infrastructure and 2D/3D game products.

- Own architecture decisions, databases, integrations, coding standards, containers, environments, cloud/VPS hosting, CI/CD, build/deployment automation, monitoring, backups and testing strategy.
- Remain hands-on across web, mobile, backend/APIs and Unity, including legacy modernization, performance work and critical production troubleshooting.
- **Impact:** technical restructuring of products, performance improvements, lower operating costs and technical support for POCs and public procurement initiatives.

MID-LEVEL FULL STACK & MOBILE DEVELOPER | AMPLIMED | 2024 - 2025

- Technical owner for marketplace products including online scheduling, telemedicine, mobile apps and service queues, covering development, integrations and mobile release operations.
- Refactored the marketplace and scheduling application and built microservices and white-label solutions focused on performance and scalability.
- **Impact:** the new white-label structure was adopted by dozens of clients and helped the company reach six-month commercial targets in approximately one quarter.

TECH LEAD | ASTRONFY | 2023 - 2024

Technical ownership of the marketplace, affiliate dashboard, support platform, web/mobile applications and 2D/3D products.

- Led architecture decisions and implementation across web/mobile structures, APIs, infrastructure, security and white-label client activation flows.
- Integrated domestic and international payment providers and cryptocurrency flows and served as a technical point of contact for clients and partners in Europe and Asia.
- **Impact:** marketplace serving 10+ countries, payment infrastructure processing thousands of monthly transactions and reduced effort required to activate new clients.

FULL STACK & MOBILE DEVELOPER | INFOGEN SISTEMAS | 2022 - 2023

Progressed from Trainee to Junior and Mid-level while taking increasing technical ownership within the mobile team.

- Worked on a GeneXus ERP, .NET web portal, APIs and mobile applications; led legacy app refactoring to React Native and owned mobile versions, maintenance and app-store releases.
- Mentored and onboarded developers, supported clients and deployments, handled integrations and produced end-to-end documentation for mobile projects and recurring ERP issues.
- **Impact:** refactored 8+ mobile apps, delivered 15+ white-label modules, standardized the mobile stack and reduced rework.

INDEPENDENT SOFTWARE ENGINEER & CONSULTANT | FREELANCE | 2018 - Present

Parallel independent work spanning complete products and fractional engineering engagements for companies and clients in different industries.

- Design architecture and build web/mobile products, dashboards, intranets, mini ERPs, integrations, real-time applications and games, as well as maintenance, troubleshooting, feature delivery and modernization of existing systems.
- Work directly with clients to turn partially defined business needs into requirements, architecture, estimates and technically viable deliverables, covering both complete products and targeted interventions.
- **Highlights:** clients and partners across 4+ countries, participation in an international sports product and a product presented at an international trade fair in Germany.

SELECTED PROJECTS & DELIVERIES

Radar Público - public procurement discovery and tracking platform built with .NET, React/TypeScript, PostgreSQL and Docker, including official-source ingestion, background services and organization-scoped authorization.

XtremeFut - futsal training application built with Expo/React Native, TypeScript, Firebase and a PHP API, with shared Android/iOS architecture, automated builds and in-app purchase/subscription integrations.

White-label scheduling platform - Laravel, Livewire, MySQL, Redis and Docker; multi-tenant architecture with APIs, permissions, queues, task scheduling, availability engine and tenant-specific branding.

EDUCATION & LANGUAGES

B.Sc. in Information Systems - Cruzeiro do Sul Virtual | In progress | Expected completion: 2027

Computer Science - UnoChapecó | Previous undergraduate studies; program later paused.

Portuguese: Native | **English:** Advanced / Professional working proficiency
